Nikitha Ranga

Software Engineer at Marriott International
Reston, Virginia, United States

Summary

I solve problems that haven't been solved before — and modernize the ones that have been around too long. Currently at Marriott International, I'm at the center of a mainframe-to-cloud transformation for the Marriott Bonvoy Platform, owning partner integrations that keep global loyalty operations running reliably as legacy infrastructure gives way to microservices. Before Marriott, at SS&C Eze I led the migration of core financial systems from monolith to microservices, building REST APIs and UIs in Node.js and Angular, and standing up monitoring pipelines that meaningfully reduced production incidents. My stack centers on Java and JavaScript, and I work with AI-powered development tools like Cursor to move faster without cutting corners. I'm also actively building in the agentic AI and generative AI space — because the next wave of scalable systems will have intelligence baked in, not bolted on. George Mason (MSCS) gave me the foundations; distributed systems at scale are where I've sharpened them. If you're working on complex modern challenges, migrating legacy systems, untangling monoliths, or rebuilding aging infrastructure for scale — I'd enjoy the conversation.

Experience

Marriott International
Software Engineer
October 2024 - Present (2 years)
Bethesda, MD

George Mason University
Research Assistant
July 2024 - October 2024 (4 months)
Fairfax, Virginia, United States

George Mason University
App Developer Intern

February 2024 - May 2024 (4 months)

Fairfax, Virginia, United States

SS&C Eze

3 years

Software Engineer

October 2021 - January 2023 (1 year 4 months)

Hyderabad, Telangana, India

Associate Software Engineer

June 2020 - September 2021 (1 year 4 months)

Hyderabad, Telangana, India

Associate Software Engineer Intern

February 2020 - May 2020 (4 months)

Hyderabad, Telangana, India

Brain O Vision

Digital Marketing Intern

June 2018 - July 2018 (2 months)

Hyderabad Area, India

This Internship increased my communication skills and marketing skills. We used Canva to make a lot of posters for company.

Hype Pronto

Web Development Intern

June 2018 - July 2018 (2 months)

Virtual

This internship helped me in developing my writing skills and check bugs in a website.

The Smart Bridge IoT

Internet Of Things Intern

June 2018 - July 2018 (2 months)

Hyderabad

With the help of this internship, I have done a project named Smart Water Management. Through this project, one can operate their bore pumps i.e., switching pump on or off from your mobile with app by checking the water level in tank.

Education

George Mason University

Master's degree, Computer Science · (January 2023 - May 2024)

G. Narayanamma Institute Of Technology And Science

Bachelor of Technology, Computer Science · (2016 - 2020)

Narayana Junior College

Intermediate, Education · (2014 - 2016)

Bhashyam Public Schools

SSC, Education · (2011 - 2014)
